HAVE YOU SCHEDULED YOUR CAR WRECK OR DISASTER?

When your home or car is damaged, do you know who to call first? Here is a hint: It isn't your insurance company, or your agent!

Every year millions of consumers will suffer auto or property damage, which will result in a substantial insurance claim. Although consumers like to believe that they are well prepared to handle serious accidents and disasters, the fact is that **less than 1 in 1,200** claimants are capable of efficiently recovering from an accident or disaster.

The reason is simple, insurance companies do not educate their insureds on how to collect money from them, nor do they want consumers to understand the claim process.

As a member of ThePlan, you will learn;

- How to prevent being a victim of insurers cutting corners on your claim repair.
- How to manage your property, so that your property does not manage you.
- How to formulate your personal disaster recovery plan, before the disaster strikes.
- How to pick the right insurer for you and also learn the insurers to avoid.
